Simulated Pearls

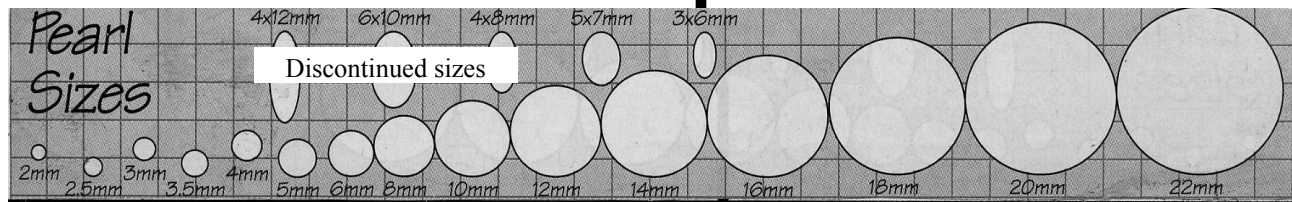

Japanese Quality strung pearls. These pearls are on strings & can be easily removed from the strings to be used on your beading projects. The gold & silver colors have a high quality metallic finish, when a pattern calls for a round gold or silver bead these pearls work great, they are much less expensive than 24k or sterling silver plated beads.

A Hooks

Works only with the
#6 size chain.

The most practical chain and hook system for sign display, item retention, and similar applications. The 'A' Hook combines the classic 'A' Coupling with the C9 Hook to form a single attachment that can be used for hanging signs, retaining small objects, or use for a variety of similar applications.

A Coupling

This size coupling works with both the #3 and #6 size chain.

Typically used with retaining chain to attach ball chain to small items (i.e. machine caps) with a screw, bolt, or rivet, to provide a flush assembly with the item surface. The standard hole diameter for the #6 AD coupling is .130". 3/8" Long.

Available in Silver or Gold

#JF218G—Gold—12 per package—**\$1.50**

#JF218S—Silver—12 per package—**\$1.50**

End Ring Connectors

This size coupling works with both the #3 and #6 size chain.

Used for the same purpose as 'A' couplings (to attach ball chain with a screw, bolt, rivet, etc.), except these are detachable rather than permanent.

Candle Colors Liquid Dye

These liquid dyes are great for coloring candle gel or
paraffin wax candles. The dyes are oil soluble thus
allowing easy mixing with the gel. The level of
concentration of these colors make it easy to color large
or small batches. The recommended usage varies from
1/2 percent of dye depending on the color and desired
shade. Keep in mind that gel candles generally use less
dye than standard paraffin wax. Will color up to 10

Aromatherapy

Pure Essential Oils

Aromatherapy

Used for Candle Making, Soap Making, Custom Perfume, Lotions, Diffusers, Bath Salts, Aromatherapy, or anywhere pure natural fragrance is desired. Essential oils are the very essence of plants. They are volatile (evaporative) oils and as such act more like alcohol than vegetable oils. Most often, essential oils are extracted from a plant's leaves or petals, but in some cases they are found in the roots, seeds or stems. These oils have traditionally been used commercially for food flavoring, perfumery and on their own, for aromatherapy. It is important not to confuse essential oils with products labeled "perfume oils" or "fragrance oils" which are effective for perfuming but are generally synthetic.

Glycerin Soap Base

This Glycerin soap was made using raw ingredients of the highest purity and contains absolutely no animal products. Hypo-allergenic. 100% pure Glycerin soap.

This is a great money maker and a very easy craft to make. Go to your local drug, discount, bath, or department store and see what they charge for a 4 oz. bar of Glycerin soap. Compared to what you can make your own soap for, the price differential will be huge.

Great for home use, cottage industry, church bazaar, flea markets, gifts, showers, home decor, girl scouts, boy scouts, church groups, camps, etc...

You can mold your own soap bars, and use them for bathing, face cleansing, hand washing, & even mild enough for baby. This is a high quality, mild soap. Add your own colors & scents. You can add Vitamin E, Aloe Vera, Oatmeal, and many other natural botanicals. Our Fragrance Oils and Essential Oils can be used for your own custom scented soaps.

These easy to follow instructions will help guide you in making your own soap shapes, bars, & loaves etc... Using the microwave instructions please be careful not to over-heat the soap. **For Beginners:** The first time you melt the soap it becomes very runny (like a watery consistency), but don't be fooled, when it cools down it will harden back to the same form as the original blocks.

Do not use any molds that can not handle the heat.

Microwave Melting:

1. Place an appropriate amount of Glycerin soap in a microwave safe container.
2. Place in microwave.
3. Microwave on high until melted. Depending upon wattage of microwave, the time needed will vary. Until time is established for the quantity desired, melt in 30 second intervals. A melted temperature of 160° F is best.

5. No stirring is required to melt.

4. Add Essential or fragrance oils and color dye and pour

Melting with Gas or Electric Stove:

1. Place an appropriate amount of Glycerin soap in a pan, dish or double boiler.
2. Heat until melted.
3. Heat until 160°F to allow for better pouring into molds.
4. To speed heating process, gentle stirring may be used. Do not whip air into the soap. Do not over-heat soap.
